

CLAIMS

I claim:

1. A foundation vent cover, comprising:
a generally rectangular flat body having an outer surface,
an inner surface, a left edge and a right edge;
a first leg extending perpendicularly from said left edge;
a second leg extending perpendicularly from said right edge;
a first foot extending perpendicularly from said first leg;
a second foot extending perpendicularly from said second
leg; and
a plurality of apertures formed through said outer surface
and said inner surface of said body.
2. The foundation vent cover according to claim 1, wherein
said body is sized and dimensioned to cover a standard 8
inch by 16 inch masonry vent.
3. The foundation vent cover according to claim 1,
including at least one aperture formed in each of said
respective first foot and second foot.

4. The foundation vent cover according to claim 1, wherein said outer surface is a decorative surface.

5. A cover for a vent, said vent cover being surrounded by the walls of a building, said cover comprising:
a generally rectangular flat body having an outer surface, an inner surface, a left edge and a right edge;
a first leg extending perpendicularly from said left edge;
a second leg extending perpendicularly from said right edge;
a first foot extending perpendicularly from said first leg, said first foot being in abutment with a wall of the building;
a second foot extending perpendicularly from said second leg, said second foot being in abutment with a wall of the building;
a plurality of apertures formed through said outer surface and said inner surface of said body; and
at least one aperture formed in each of said first foot and said second foot.

6. The cover according to claim 5, wherein said body is sized and dimensioned to cover a standard 8 inch by 16 inch masonry vent.

7. A foundation vent cover, comprising:

a generally rectangular flat body having an outer surface, an inner surface, a left edge and a right edge;

a first leg extending angularly from said inner surface wherein said first leg is canted toward said right edge;

a second leg extending angularly from said inner surface wherein said second leg is canted toward said right edge;

a first foot formed on said first leg and extending therefrom at an acute angle;

a second foot formed on said second leg and extending therefrom at an acute angle; and

a plurality of apertures formed through said outer surface and said inner surface of said body.

8. The foundation vent cover according to claim 7, wherein said body is sized and dimensioned to cover a standard 8 inch by 16 inch masonry vent.

9. The foundation vent cover according to claim 8, wherein said outer surface is a decorative surface.
